Ambitious programmer passionate about writing performant, functional code. Driven by a motivation to learn from mistakes and feedback, continuously improving my craft with the goal of creating software that others genuinely enjoy using.

Work Experience

Tenstar Simulation

Jan 2024 - Present

At Tenstar Simulations, I have sustained the same drive and enthusiasm from when i left Tension. By consistently championing improvements to internal tools and broader systems alike, and securing management support for these initiatives, I have established myself as a proactive, solutions-focused contributor known for pushing discussions toward the best technical outcomes.

Tension Graphics

Nov 2021 - Dec 2023

Tension Graphics made me the great programmer that i am today. From the amazing mentors that i had as colleagues, to the amazing projects i got to work on. They entrusted me with modernizing the rendering pipeline to Vulkan for both desktop and mobile, managing and developing a test project in Godot as a consultant. I entered as a fresh student, but left as a programmer that was hungry to improve and learn even more.

GVT Intermodal

Oct 2019 - May 2020

During my internship at GVT Intermodal, I managed software throughout its full lifecycle, primarily triaging and resolving bug reports, while also assisting colleagues with smaller projects.

IceHosting

Oct 2018 - Jan 2019

During my internship at IceHosting, I gained extensive exposure to a wide range of areas from server administration to the beginnings of my interest in design. Although the internship was brief and I was unable to complete my work to the fullest, the experience taught me the value of learning from everyone around me, both professionally and personally.

Education

PlaygroundSquad

2020 - 2022

Game Development school where i learned C++, Unity, Unreal and general deeper programming concept. And got to work together on cool projects with fellow students.

ROC van Twente

2017 - 2020

General vocation collage where i started my programming and the love for computers. Learned basic web development.

Skills

- Fast Learner
- Communication
- Source Control
- 5+ Years experience in C++
- Graphics (Vulkan, DX11, OpenGL)
- Mobile (Android & IOS)
- Web (HTML, Vue, HTMX, TS/JS)
- Embedded (C, Zig)
